## GOALS

Looking for an opportunity to work in an environment where my co-workers are excited about the work they are doing, look forward to continuous learning and take pride in the code they write. I would like to give back by mentoring other beginners, being involved in local meet ups and contributing to the dev community.

## KEY TECHNOLOGIES

Ruby • Rails • JavaScript • jQuery • HTML • CSS • SQL • RSpec • Git • Sinatra • Active Record

## EXPERIENCE

### **Dev Bootcamp Chicago, Apprentice**

**April 2013 – July 2013**

A twelve-week, full-time, intensive web development training boot camp using Ruby on Rails.

Spent approximately 900 hours learning various soft and hard skills focusing on web technologies. Hard skills include Ruby, Rails, Git, JavaScript, jQuery, RSpec, HTML, CSS, SQL and Active Record. Soft skills include pair programming, Scrum/Agile techniques, working in groups and engineering empathy.

### **Maples, Technical Project Manager**

**Jan 2011 – Dec 2012**

Defined scope of project and set project goals. Developed project plans, communication plans and other relevant documentation required for information technology projects. Monitored and tracked project milestones, deliverables and target dates using Microsoft Project. Communicated stakeholder requirements to project team members and managed them accordingly. Performed risk assessments for projects and assessed project issues. Identified solutions to meet productivity, quality and project goals. Proactively communicated project status, issues and risks to management. Conducted regular project meetings with team members and management. Provided weekly project reports to management and weekly team reports to team members.

### **Maples, Database Administrator**

**May 2005 – Jan 2011**

Designed, implemented and maintained database server backups. Monitored and troubleshooted faults on database servers and components. Managed implementation of critical patches and service packs. Assisted Infrastructure Manager in the preparation of Disaster Recovery Plans. Periodically conducted disaster recovery tests. Provide 3<sup>rd</sup> line support, guidance and direction to IT resources in Head Office and other Offices. Provided out of hours on call cover in rotation with other members of the Infrastructure Team. Identified and suggested improvements to servers and systems.

### **Ansbacher (Cayman) Limited, IT Support Technician**

**July 2003 – May 2005**

Provided first line support to users. Installed and configured computers and/or servers with new hardware or software. Developed software programs to assist users, such as databases and web pages. Maintained backup tapes for all servers. Ensured daily backup tapes were carried offsite.

## EDUCATION

### **Dev Bootcamp, Chicago, IL**

**April 2013 – July 2013**

A twelve-week intensive web boot camp. 900+ hours of immersive learning of modern web technologies.

### **Barry University, Miami Shores, FL**

**Sept 1999 – May 2003**

Bachelor of Science, Computer Information Sciences  
Minor in Business
